PROTECTING YOUR INVESTMENT

# Genuine Air Compressor Parts

# Why Use **Genuine** Gardner Denver Parts?

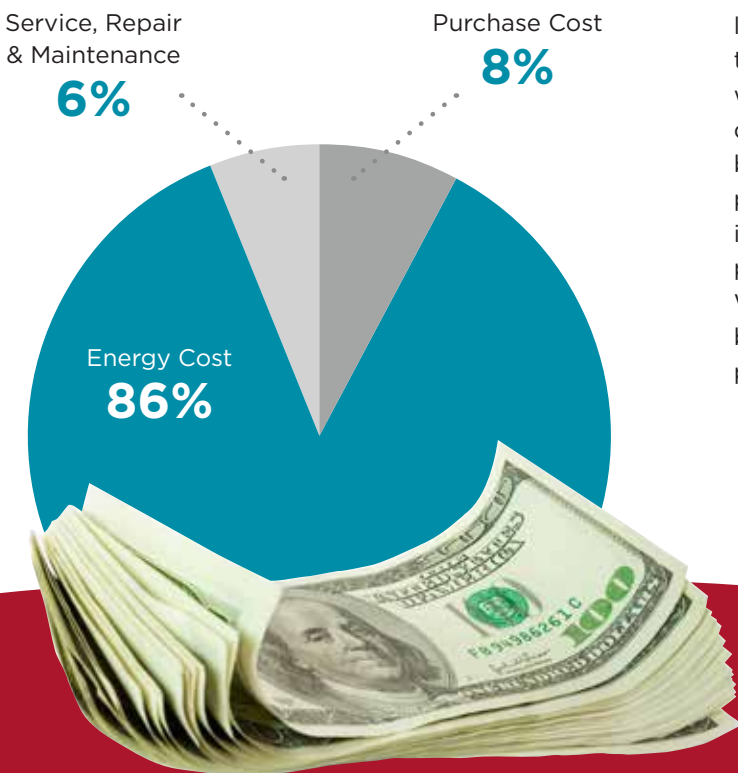

## Quality

Each and every part that goes into a Gardner Denver compressed air system is tested and approved by our world-class engineering team. Pirate parts do not meet OEM specifications and often create costly operational problems that the provider has no capability to resolve.

## Efficiency

Energy consumption makes up about 86% of the cost of purchasing and running an air compressor for the initial 5 years. Using the right parts and getting them replaced at the right time prevents energy waste in producing the amount of compressed air needed by your operation. Dirty and inferior filters tend to increase the pressure drop, and energy across your compressed air system.

## COST OF COMPRESSED AIR OVER 5 YEARS

## Longevity

In addition to efficiency, inferior filters and separators are a huge factor in reducing the life expectancy of your air compressor. Inferior filters and separators allow more contaminants into your air compressor. Once those contaminants reach the vital air compressor components, the result can be anything from polluted, shorter-life lubricant to a total airend replacement.

## Availability

Keeping your operation up and running is key. Our state-of-the-art production and warehouse facilities hold all the components needed to maintain your air compressor. On top of that, our distribution network is on the job 24/7, ready to get those parts installed on your equipment and get you back to maximum efficiency.

## Warranty

Gardner Denver rotary screw air compressors feature an industry-leading 10 Year Platinum Extended Warranty. The quality and performance of genuine parts, lubricants and consumables allow Gardner Denver to provide you with the peace-of-mind that comes with this warranty. Lower quality pirate parts have been proven less effective at protecting your compressor investment. Backing the product with the Platinum Warranty requires only the best parts - only genuine parts.

# Beyond Parts: Total System Protection

## AEON Lubricants: Engineered to Complete Your System

Lubricant is the “lifeblood” of a compressed air system. Every Gardner Denver rotary screw air compressor ships from the factory filled with one of our AEON Lubricants that has been engineered to get the most out of the machine. Continuing to use these AEON Lubricants not only maintains your extended warranty, but also plays a vital role in maximizing the efficiency and longevity of your air compressor.

## Don't Forget Service

Just as important as using the right parts is using the right service outlet. Gardner Denver's world-class distribution network is factory-trained to keep your air compressor running as efficiently and reliably as possible. Wherever you are in North America, there is an authorized distributor covering your area, ready to assist with your sales, service and technical needs.

The leader in every market we serve  
by continuously improving all business processes  
with a focus on innovation and velocity
